List of tables	viii
List of figures	ix
New introduction by the authors	1
Preface and acknowledgments	7
Introduction	11
PART ONE FRAMEWORK	25
<b>Chapter one: Understanding electoral instability</b>	27
The measures	28
Concepts and indices	31
Aggregate volatility as a system property	33
Aggregate volatility and individual voting shifts	34
Theoretical variants	40
A general framework for analysis	42
PART TWO THE STABILISATION OF EUROPEAN ELECTORATES	57
<b>Chapter two: Interpreting electoral change: a debate</b>	59
The evidence of aggregate data	62
Parties and cleavages	65
<b>Chapter three: The bias towards stability</b>	70
Variance in electoral instability	70
Variance in class-cleavage volatility	76
The relationship between cleavage volatility and total volatility	83
Types of elections and cleavages	85
<b>Chapter four: Electoral instability and class-cleavage persistence 1885–1985</b>	96
Testing the freezing hypothesis	96
The salience of the class cleavage	103
A general stabilisation?	105
National variations	106
Trends over time: a summary	117

PART THREE THE DETERMINANTS OF ELECTORAL INSTABILITY	123
Introduction	125
<b>Chapter five: The fragmentation of party systems</b>	127
Which parties count?	128
Trends in fragmentation	129
Numbers of parties and electoral volatility	131
National variations	134
<b>Chapter six: Institutional constraints and voter opportunities</b>	141
The impact of enfranchisement	142
Voting systems and electoral instability	145
Change of electoral systems	146
Majoritarianism versus proportionality	149
From dichotomised to continuous variables	152
Indicators of disproportionality	154
Disproportionality and volatility	155
Cross-national variation	158
Institutional constraints and electoral instability	160
<b>Chapter seven: Electoral participation</b>	165
When turnout matters	166
Turnout increase	167
Turnout decline	168
Variation between countries	172
Electoral participation and volatility	175
Format, institutional change, and participation	176
<b>Chapter eight: The space of competition</b>	182
The extent of electoral elasticity	182
Spatial competition and electoral instability	184
An interpretation of negative findings	189
Another test of the spatial hypothesis	191
National variations	193
Space and segmentation	196
<b>Chapter nine: Cleavage systems</b>	198
The concept of cleavage	199
Social homogeneity versus closure of mobility	205
Empirical evidence	209
The dimension of cultural heterogeneity	210
The organisational dimension	214
Cultural heterogeneity and organisational density	220
Segmentation and electoral instability	223

PART FOUR COMPETITION AND IDENTITY	231
<b>Chapter ten: Explaining electoral instability</b>	233
The overall pattern	234
Electoral phases	240
Cross-national variation	244
Refining the model: spatial, organisational, and cultural factors	248
A parsimonious model	255
<b>Chapter eleven: Socio-organisational bonds, institutional incentives, and political markets</b>	261
The stabilisation of voting patterns	262
From competition to identity	263
The forces shaping electoral mobility	266
Some applications: polarised pluralism and consociational democracy	271
Towards destabilisation?	274
<b>Appendices and data-base</b>	
1 Rules for calculation and notes on sources	281
2 Party volatilities: data-base	291
Index	319
